

Christmas BOX

What you need:

Recycled Christmas cards

Scissors

Ruler

Pencil

Sellotape

Cut Christmas card in half along the fold line.

Using the template as a guide, turn the picture part of the card, face down.

Using a pencil and ruler, rule a straight line from one corner to the other and repeat so you have an "X" on the card.

Fold one end of the card to the middle of the "X" and crease. Unfold. Repeat with the other end. Unfold.

Fold the side of the card to the middle of the "X" and crease. Unfold. Repeat with the other side. Unfold.

Cut part way along the folded line to make 2 tabs at each end. (Don't cut past the overlapping creased line.)

Fold both tabs up and in towards each other - secure with tape.

Fold the end up and over the tabs and secure with tape.

Repeat for the other end.

To make the bottom of the box, do exactly the same EXCEPT fold the card just past the centre of the "X" (both ends and sides), so that the bottom of the box fits snugly into the top of the box.
